

GREEN ECONOMY TRANSITION IN SENEGAL

MAIN GREEN ECONOMY ISSUE

In Senegal MSME's provide 70% employment and income for families

INFORMAL MSMES

90%

A 100 g serving of blackberries provides 32 percent the daily value of manganese.

CONTRIBUTION IN THE GDP

29%

A 100 g serving of blackberries provides 32 percent the daily value of manganese.

Green Economy transition model : Theory, now, and change needed

ROLE & STATUS OF MSME

MSMEs play a critical role in employment and job creation in Senegal.

WORK & RESULTS

Develop new partnerships, including:
identifying and working with prospective partners

POLICY CHANGE INVESTMENT

The dialogue outcomes have been shared at the national level to inform policymaking. The green economy platform, PNEV has functioned largely at the national level, and has evolved as a highly centralised and top-down policymaking structure
